

# Broadcasting The Internet

**“ STING + CTB : IP Broadcasting => Fast & Efficient ”**

**Existing IP ‘Connectivity’ => Latency & High Bandwidth Consumption**

**Inefficient Replication of Many Identical IP Sessions**

**CTB Innovation : IP Broadcasting => Fast & Efficient**

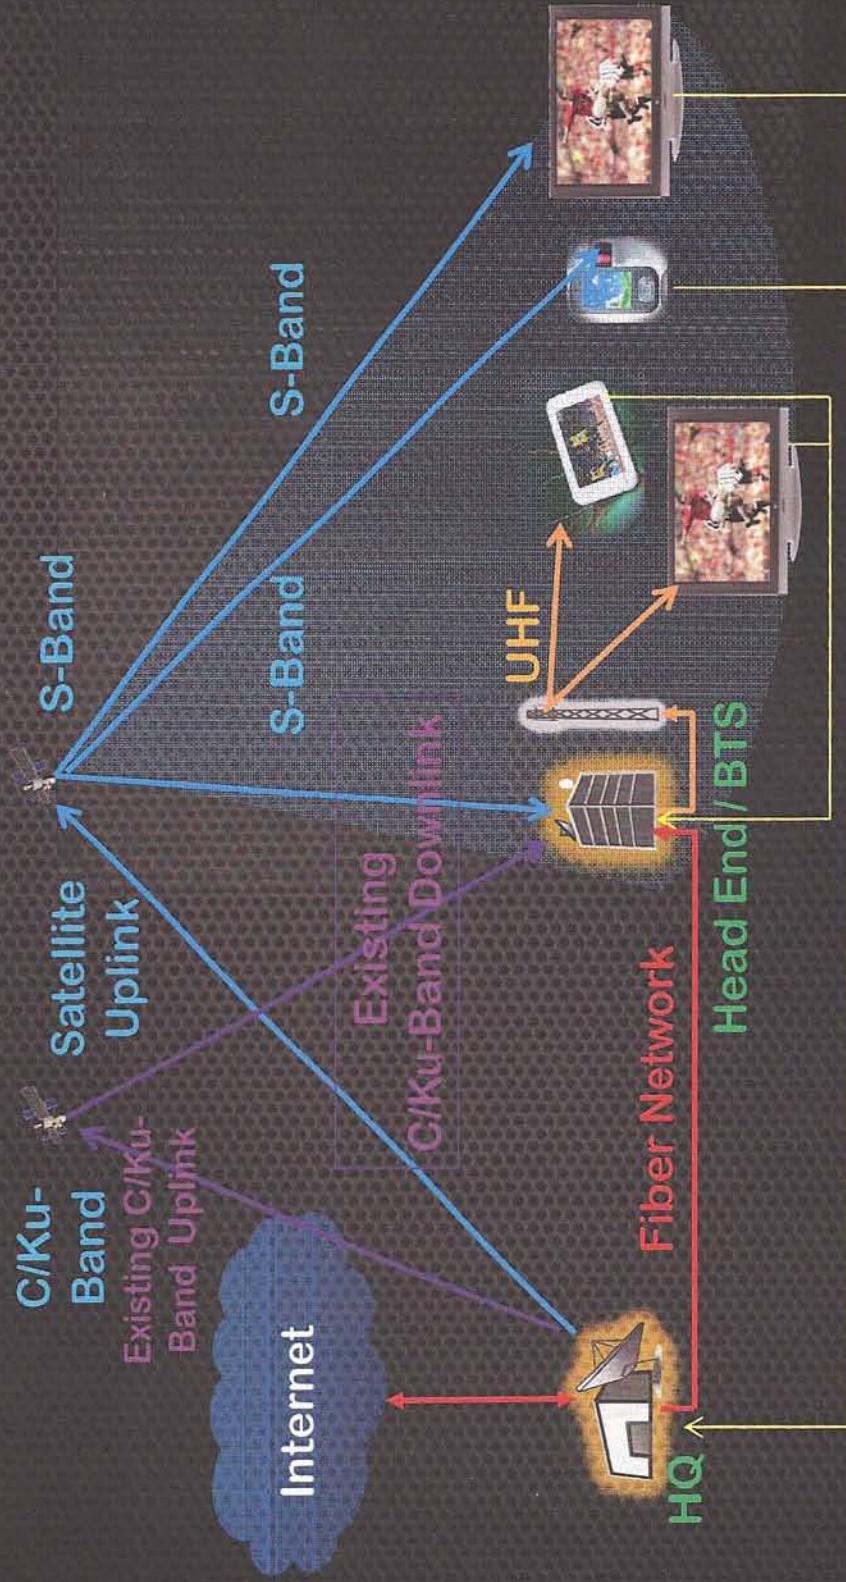

**Low Bandwidth Requirement Without Latency** This is possible as large numbers of people seek similar information / content.

The ability to store content at the user device level for immediate retrieval enhances the efficiency at all levels of the Internet cloud.

# Transformational Technologies

**“Converged Mobile Multimedia Broadcast  
'Enables' complete National Coverage & Multiple Services”**
